Interdisciplinary Perspectives on International Law and International Relations: The State of the Art by Jeffrey Dunoff and Mark Pollack

International Law and International Relations: Synthesizing Insights from Interdisciplinary Scholarship brings together the most influential contemporary writers in the fields of international law and international relations to take stock of what we know about the making, interpretation, and enforcement of international law.

The contributions to this volume critically explore what recent interdisciplinary work reveals about the design and workings of international institutions, the various roles played by international and domestic courts, and the factors that enhance compliance with international law.

The volume also explores how interdisciplinary work has advanced theoretical understandings of the causes and consequences of the increased legalization of international affairs.

International Law and International Relations (2nd Edition) By: David Armstrong

In this fully updated and revised edition, the authors explore the evolution, nature and function of international law in world politics and situate international law in its historical and political context. They propose three interdisciplinary 'lenses' (realist, liberal and constructivist) through which to view the role of international law in world politics, and suggest that the concept of an international society provides the overall context within which international legal developments occur.

These theoretical perspectives offer different ways of looking at international law in terms of what it is, how it works and how it changes. Topics covered include the use of force, international crimes, human rights, international trade and the environment. The new edition also contains more material on non-western perspectives, international institutions, non-state actors, and a new bibliography. Each chapter features discussion questions and guides to further reading.
